

Please amend the present application as follows:

Claims

The following is a copy of Applicant's claims that identifies language being added with underlining ("___") and language being deleted with strikethrough ("—"), as is applicable:

1. (Currently amended) A method for providing notification ~~to a user~~ that a document was transmitted ~~with~~ from a transmission device, the method comprising ~~the steps of:~~

determining an identity of a sender of a document;
identifying the location of an email account of the ~~user~~ document sender; and
sending a ~~copy of the transmitted~~ transmission notification to the sender's email account that indicates that the document to the user email account was transmitted by the transmission device.

2. (Currently amended) The method of claim 1, wherein ~~the step of~~ identifying the location of an email account ~~of the user~~ comprises identifying the location of the email account from ~~user~~ sender identity information entered into the transmission device in association with transmission of the document.

3. (Currently amended) The method of claim 1, wherein ~~the step of~~ sending a ~~copy of the transmitted document~~ notification comprises sending a copy of the transmitted document to a sent items folder of a ~~user~~ an email application of the sender.

4. (Currently amended) The method of claim 3, wherein the ~~user~~ sender's email application executes on a ~~separate~~ computing device that is separate from the transmission device.

5. (Currently amended) The method of claim 1, wherein the document ~~has been~~ is transmitted to an intended recipient by the transmission device via email.

6. (Currently amended) The method of claim 1, wherein the document ~~has been~~ is transmitted to an intended recipient by the transmission device via facsimile.

7. (Currently amended) The method of claim ~~6~~ 3, wherein ~~the step of~~ sending a copy of the transmitted document comprises creating a copy of a facsimile document, appending the created copy to an email message, and sending the email message to the ~~user email account~~ sender's email application.

8. (Currently amended) A system ~~for providing notification to a user that a document was transmitted with a~~ that operates within a document transmission device, the system comprising:

means for determining an identity of a sender of a document;

means for identifying the location of an email account of the user document sender; and

means for sending a copy of the transmitted transmission notification to the sender's email account that indicates that the document to the user email account was transmitted by the transmission device.

9. (Currently amended) The system of claim 8, wherein the means for identifying the location of an email account ~~of the user~~ comprise means for identifying the location of the email account from ~~user~~ sender identity information entered into the transmission device.

10. (Currently amended) The system of claim 8, wherein the means for sending a ~~copy of the transmitted document~~ transmission notification comprise means for creating a copy of a facsimile document, appending the created copy to an email message, and sending the email message to the ~~user~~ sender's email account.

11. (Currently amended) A transmission device, comprising:
a processing device; and
device operation hardware configured to transmit documents; and
memory including a notification module that is configured to determine an
identify of a document sender and send a copy of transmission notification documents
~~transmitted by the transmission device~~ to an email account of the document sender
that indicates that the document was transmitted by the transmission device.

12. (Currently amended) The transmission device of claim 11, wherein the notification module is configured to send to the sender's email account a copy of documents that were transmitted via email ~~to the email account~~ from the transmission device.

13. (Currently amended) The transmission device of claim 11, wherein the notification module is configured to send to the sender's email account a copy of

documents that were transmitted via facsimile ~~to the email account~~ from the transmission device.

14. (Original) The transmission device of claim 13, wherein the notification module is further configured to create a copy of facsimile documents, append them to email messages, and send the email messages containing the appended copies to the email account.

15. (Original) The transmission device of claim 11, wherein the transmission device is a multifunction peripheral (MFP).

16-28. (Canceled)

29. (New) The transmission device of claim 8, wherein the means for sending a transmission notification comprise means for sending a copy of the transmitted document to a sent items folder of an email application of the sender.

30. (New) The transmission device of claim 11, wherein the device operation hardware is configured to email documents to intended recipients.

31. (New) The transmission device of claim 11, wherein the device operation hardware is configured to transmit documents to intended recipients via facsimile.
